Summary of the Seminar: The students of Philosophy Department of Al-Ameen Memorial Minority College participated in the seminar; some of them also presented paper on the topic "Metaphysics: Indian and Western philosophy " offers a comparative exploration of metaphysical thought from two distinct cultural and philosophical traditions. It delves into the rich tapestry of Indian metaphysics, which encompasses a diverse array of philosophical schools, including Vedanta, Nyaya, and

Samkhya. These traditions grapple with fundamental questions about the nature of reality, the self, and the ultimate source of existence, drawing on ancient scriptures such as the Vedas and Upanishads to articulate intricate metaphysical frameworks. The book illuminates key concepts such as Brahman, Atman, karma, and moksha, shedding light on the profound insights and spiritual aspirations that characterize Indian metaphysical discourse.

In parallel, the book explores Western metaphysics, tracing its origins from the works of pre-Socratic philosophers like Parmenides and Heraclitus to the sophisticated systems of Plato and Aristotle. It examines foundational metaphysical inquiries concerning the nature of being, the mind-body relationship, and the existence of abstract entities, as well as the enduring influence of medieval scholasticism and the modern developments in metaphysical thought spurred by figures such as Descartes, Spinoza, and Leibniz. Through comparative analysis, the book elucidates both the convergences and divergences between Indian and Western metaphysical perspectives, fostering a deeper appreciation for the diversity and complexity of human attempts to comprehend the nature of reality.

Summary of the Seminar: The students of Philosophy Department of Al-Ameen Memorial Minority College participated in the seminar; some of them also presented paper on the topic "Philosophy of Mind and Cognitive Science" is a captivating exploration of the nature of consciousness and the mind-body relationship, drawing insights from both philosophical inquiry and scientific research. The book

delves into foundational questions such as the nature of mental states, the relationship between mind and brain, and the possibility of artificial intelligence. It examines various philosophical theories of mind, including dualism, behaviorism, functionalism, and the computational theory of mind, elucidating their strengths, weaknesses, and implications for understanding human cognition. In tandem with philosophical perspectives, the book delves into the interdisciplinary field of cognitive science, which integrates insights from psychology, neuroscience, linguistics, and computer science to unravel the mysteries of the mind. It explores cutting-edge research on topics such as perception, memory, language processing, and decision-making, shedding light on the neural mechanisms that underlie cognitive phenomena. Through rigorous analysis and interdisciplinary synthesis, the book navigates the complex terrain of mind and cognition, addressing perennial philosophical puzzles while also engaging with empirical evidence and scientific methodologies. It invites readers to critically reflect on the nature of consciousness and the limits of our understanding, while also illuminating the potential for interdisciplinary collaboration in unraveling the mysteries of the mind. Over all "Philosophy of Mind and Cognitive Science" offers a comprehensive and thought-provoking exploration of one of the most fascinating frontiers of human inquiry.
